

Embedded and Real-Time Systems

Project 2

Due to Aban 8th

Play Vivaldi's Four Seasons, Autumn track using FRDM-KL25Z.

It is not necessary to play the whole track. Just play it as much as it is recognized by human ear.

P.S. You can use buzzers to play the signal. They are available at CEIT Hardware Lab.

Extra Points: Use an amplifier to increase the power of the signal and amplify the sound.

The mentioned track has been sent to Embedded Systems 2018 Telegram group and is also available online.

Deadline: Aban 8th, 23:55.
